MANITOBA **Crown Land Classification Committee**

Interdepartmental Operational Crown Land Plans

INTRODUCTION

BACKGROUND

The management and administration of Crown land is shared by the Departments of Natural Resources and Agriculture. The Agricultural Crown Lands Branch issues agricultural leases and permits of occupation or use for those Crown lands which are designated by the Minister of Natural Resources as: primarily agricultural lands; and multiple use lands which may be used for agricultural purposes on an interim or secondary use basis, subject to specific conditions and covenants required by other resource users.

The principal responsibility for Crown land remains with the Department of Natural Resources, which administers the Crown Lands Act excepting those specific sections under the responsibility of the Minister of Agriculture.

The classifying to use of Crown land in Agro-Manitoba is the responsibility of the Crown Land Classification Committee. This is an interdepartmental committee with representation from the Departments of Agriculture, Natural Resources and Municipal Affairs. The Crown Land Classification Committee reports to and receives its direction from the Provincial Land Use Committee of Cabinet.

THE REPORT

The material contained, in this report, is part of the Crown Land Classification Committee's Operational Planning Process which reviews, refines and updates on an ongoing basis a set of Crown land classification maps for Agro-Manitoba.

This report is prepared by the CROWN LAND CLASSIFICATION COMMITTEE as a direct and ongoing result of the field activities of the various BLOC PLANNING COMMITTEES.

OPERATIONAL CLASSIFICATION SYSTEM

The Crown lands in this report are classified utilizing an open ended comprehensive coding system which dictates on a quarter section basis not only the land use, but also the intensity of use, the amount of development (that is, the amount of clearing which can take place), and the length of time the Crown land can be committed via various legal instruments (such as leases, permits, contract, etc.). These land use classifications are supplemented by land management guidelines which address site specific and physical factors as required; with the entire process within a stated planning framework and consistent with approved procedures.

The Operational Classification System is open-ended and provides for additional codes to be added upon approval by the Crown Land Classification Committee.

INTRODUCTION

OPERATIONAL PLAN APPROVAL

Operational Crown Land Plans are prepared, amended and approved by the Crown Land Classification Committee. Appeals to operational plans shall also be directed to the Crown Land Classification Committee with the Provincial Land Use Committee the final authority.

LAND USE ADMINISTRATION

The Operational Plans as presented dictate Crown land use. No other use is allowed; that is all other potential uses are considered conditional and must be reviewed, cleared and approved prior to their being allowed.

The use of Crown land is administered through instruments such as leases, permits, contracts, agreements, etc. which are issued by the Crown to individuals, corporations, etc. or declared by the Crown through Orders-in-Council.

Most of the Crown land outside of Order-in-Council areas (i.e., Crown land not included in Community Pastures, Provincial Parks, Provincial Forests, Ecological Reserves and Wildlife Management Areas, etc.) are administered under the authority of the Crown Lands Act. This Act is administered by the Department of Natural Resources, Lands Branch with certain specified sections the responsibility of the Department of Agriculture, Agricultural Crown Lands Branch.

These contracts, leases, permits, agreements, etc. must be in conformity with these Interdepartmental Operational Crown Land Plans.

OPERATIONAL PLAN UPDATE

These OPERATIONAL CROWN LAND PLANS are reviewed and revised as required once yearly. Upon receipt of Crown Land Classification Committee approval, these plans are used to administer and guide Crown land use for that year.

These plans have been updated on a yearly basis since their inception in 1976, however, as of January, 1982 revision, all maps which were revised or re-drafted are labelled indicating the date of the last revision. All maps not showing a revision date had their last review completed with the July, 1981 special update. The latest update is indicated below.

Date	Date
January, 1977	January, 1982
January, 1978	January, 1983
January, 1979	January, 1984
January, 1980	
January, 1981	
July, 1981 special update	

INTRODUCTION

PROVINCIAL CROWN LAND PLANNING PROCESS

The Operational Crown land plans are part of a larger Provincial Crown land planning process, whereby these operational plans must conform to Provincially approved Crown Land Plans. The Provincial plans state general land use intent and policy within a framework which is related to operational land use codes on a standardizied basis, (Table 1).

Where a Provincial Crown Land Use Classification Plan has been prepared, this Provincial Plan has precedence over the Operational Crown Land Plan should any conflict between the two plans arise.

As of this printing, a Provincial Crown Land Use Classification Plan has been prepared for the following Rural Municipalities and Local Government Districts in Agro-Manitoba.

*1.	Western Interlake Planning District	- R.M. of St. Laurent - R.M. of Coldwell - R.M. of Siglunes
*2.	Cypress Planning District	- R.M. of North Cypress - R.M. of South Cypress
3.	Selkirk and Area Planning District	- R.M. of St. Andrews - R.M. of St. Clements
*4.	Brokenhead River Planning District	- R.M. of Brokenhead
*5.	Neepawa and Area Planning District	- R.M. of Langford - R.M. of Rosedale
6.	South Riding Mountain Planning District	- L.G.D. of Park (South) - R.M. of Stratclair - R.M. of Harrison - R.M. of Clanwilliam
*7.	Eastern Interlake Planning District	- R.M. of Bifrost - R.M. of Gimli
*8.	South Interlake Planning District	- R.M. of Rockwood - R.M. of Rosser
9.	Nor-Mac Planning District	- R.M. of North Norfolk
10.	R.M. of Portage la Prairie	- R.M. of Portage la Prairie

---

*These Crown land plans have received approval by the Provincial Land Use Committee of Cabinet. The others are in draft form under review.

SPECIAL BLOCK CODES (To be used only with approval of the C.L.C.C.)

Z1

- Agriculture leaseable, 60 acres may be cleared per quarter providing 40 acres of native woody vegetation remain. Location of clearing by joint decision.

OR

- Up to 120 acres may be cleared per quarter, on 2 quarters providing 40 acres of native woody vegetation remain per quarter. Maximum clearing on remaining quarter in the block is 60 acres per quarter provided 40 acres of native woody vegetation remain per quarter and not to exceed the total intent of the 60 acres code per quarter. Once allowable clearing has been reached, the remaining undeveloped quarters shall be designated code 7a. Location of clearing by joint decision.

Z2

Agriculture leaseable, 80 acres may be cleared provided that 40 acres of native woody vegetation remain per quarter.

OR

Up to 120 acres may be cleared per quarter section on 2 quarters providing 40 acres of native woody vegetation remain per quarter. Maximum clearing in remaining quarters in block is 80 acres per quarter providing 40 acres of native woody vegetation remain per quarter and not to exceed the total intent of the 80 acre code per quarter. Once allowable clearing has been reached, the remaining undeveloped quarters shall be designated code 7a.

DEFINITIONS

CLASSIFICATION SYSTEM DEFINITIONS

AGRICULTURAL USE - identifies Crown lands for present use or future use as pasture, both improved and native, and as cropland, (including paddy production). Normal activities include garzing, haying and cultivation. For purposes of this classification these land uses are termed extensive agricultural use, for intensive uses see agriculture miscellaneous.

Community Pasture - Agricultural grazing land set aside and designated for community use for grazing purposes by Order-in-Council. The Pastures are operated by the Federal P.F.R.A. Program.

Department of Natural Resources Manager Approval Required - requires that before allocation and/or any advertising by Agricultural Crown Lands Branch, the appropriate manager (Forester, Land Manager, or Park Planner, Biologist, etc.) must be contacted specifically regarding these lands. No action can be taken without his approval.

Development - the carrying out of construction, erection or placing of any building or excavation or other operation on, over or under land or the making of any change in the use or intensity of use of any land or building or premises. This includes clearing, drainage, breaking, seeding, spraying, etc. (except fencing and those rights prescribed under a given lease - wells, dugouts, corrals, shelter, etc.).

Development Reserve - Crown land areas with potential for more intensive use, however, limited access, low demand, need for extensive capital infrastructure (drainage), new technology or low service infrastructure requires that use be restricted at this time.

Ecological Reserve - Crown land designated as such under the authority of An Act Respecting Crown Lands or the Ecological Reserves Act.

Fisheries - means Crown land identified as being significant and critical fish habitat, i.e., spawning grounds and nursery, rearing, food supply and migration areas on which fish depend, directly or indirectly, in order to carry out their life process. The area to be identified and coded fisheries includes not only that portion of the water body critical as fish habitat but also the immediate surrounding land (buffer) necessary to protect the habitat. The size of the area including buffer area to be coded fisheries shall depend on the physical nature of the site and the adjacent or allowable uses of the shoreland.

DEFINITIONS

Joint Decision - decision of the Bloc Planning Committee is required.

Mineral Extraction - Crown land presently being mined, to be mined in the near future or land with deposits which will eventually be mined.

Miscellaneous Uses -

a) Agriculture Miscellaneous - Crown land presently being used or identified for future use as; beekeeping, dugouts, feedlots, herb farms, piggeries, veterinarian clinics, haying cabins, gardens, farm residences and associated buildings, education and research sites, etc. outside of unincorporated and incorporated cities, towns and villages.

b) Forestry Miscellaneous - Crown land presently being used or identified for future use as; tree nurseries, experimental plantations, wood piling areas, sawmill sites, education and research, etc. outside of unincorporated and incorporated cities, towns and villages.

c) Outdoor Recreation Miscellaneous - Crown land presently being used or identified for future use as; campgrounds, tourist lodges, camps, shooting lodges, hunting cabins, play grounds, cottages, and other undesignated lands held by Parks Branch, Golf and Country Clubs, etc. outside of unincorporated and incorporated cities, towns and villages.

d) Mineral Miscellaneous - Crown lands presently being used or identified for future use as; aggregate stock pile areas, processing sites, drilling sites and oil wells and associated sites, petroleum storage tanks, etc. outside of incorporated and unincorporated cities, towns and villages.

e) Wildlife Miscellaneous - Crown lands presently being used or identified for future use as; fish hatchery sites, fish stations, packing sheds, trapping cabins, mink ranching, education and research sites, etc.

f) Other Miscellaneous - Crown lands presently being used or identified for future use as; garbage dumps, nuisance grounds, air strips, boat docks-houses-ramps-launches, water supplies, military reserves, penitentiaries, trailer parks, non-farm rural residential, trailer parks, etc. outside of incorporated and unincorporated cities, towns and villages.

Multiple Coding - multiple coding is the technique used to assign more than one code to a parcel of Crown land. The codes which may be assigned need not be complementary.

DEFINITIONS

Natural Lands - Crown land coded under this category shall be limited to those areas identified as best kept from development. Generally, these areas are to remain as they occur in nature.

a) Erosion Prone/Fragile/Hazard Lands - Crown land which are prone to flooding, instability, will erode through run-off or wind action including lands which have been identified as being important because they are fragile in nature and are land forms which require protection if they are to maintain their characteristics; e.g., slopes greater than 31%, sand dunes.

b) Bedrock - Crown land which have extensive outcropping of bedrock, very shallow soils over bedrock, or a degree of stoniness which restricts use. Includes uneconomical surface gravel and sand deposits.

c) Marsh, Swamp, Bog, Fen - Poorly drained Crown land whose site characteristics preclude intensive use at the present time.

  i) Marsh - tract of soft, wet land usually low lying and partly or completely under water, has herbaceous vegetation rather than trees.

  ii) Swamp - tract of low lying wooded area which is intermittently saturated; dampness due to poor drainage, wood is not of commercial value.

  iii) Bog - a peat-covered or peat-filled area, generally with a high water table - peat is not of commercial value at this time.

  iv) Fen - a peat-covered or peat-filled area, with a high water table, which is usually at the surface - peat is not of commercial value at this time.

Non-Conforming Use is an existing use which must be accepted in the short term (a lifetime lease), but which is inappropriate in the long term. The intent is to change the use at the earliest possible time with a minimum of negative social impact. Thus, the use will be changed upon expiration of existing commitments. Infamily transfers are permitted.

Bloc Planning Committees shall code Crown lands for long-term use but shall identify non-conforming uses. The map shall indicate non-conforming uses by underlining the code.

DEFINITIONS

Open Space - Crown lands which have been evaluated for use, agriculture, forestry, wildlife, etc. and are considered best left in their natural state with no particular use identified or allowed. Generally low capability lands of a non-descript or highly variable physiographic type.

Outdoor Recreation - recreation sites where the natural setting or resource is the principal component. Crown lands coded for outdoor recreation permit but is not limited to activities such as bathing, cottaging, camping, etc. All CLI class 1, 2 and 3 lands for outdoor recreation should be coded under this category.

Project Area - an area of Crown land where an approved project is established or is presently under consideration.

Provincial Forest - Crown lands designated as such in the regulations under An Act Respecting the Administration and Conservation of Forests in the Province.

Significant Shoreland - that area of Crown land which may include water, wet beach, dry beach and backshore which has been identified as being of public significance. It shall include such areas approved by the Provincial Land Use Committee as requiring protection as identified through the Crown land sale program and areas identified by the planning process.

i) Wet beach means the area of beach below the normal high water mark usually outward to the 1.5 meters depth contour at normal low water.

ii) Dry beach means the area of beach above the normal summer high water but normally subject to wash by highwater, or storm waves.

iii) Backshore means that area extending inland from the dry beach required to support or protect the resources, uses, activities or facilities.

See Explanations and Interpretation Section for application of this code.

Site Plan Filed - to use this code a site plan must be filled.

Special Forest Area - a Crown land area designated by Order-in-Council for the purpose of forest management, timber harvest, reforestation or research, and not presently designated as Provincial Forest.

DEFINITIONS

Timber Removal Priority - this code indicates which parcels of Crown land that have valuable (marketable) timber volumes which are to be harvested prior to implementation of the land use code. Timber removal must be in accordance with the long term allowable development. Code is to be applied to vacant Crown land coded for long term agricultural use. These lands shall not be advertised by Agricultural Crown Lands Branch prior to removal of the timber as per the development code. Once the timber has been removed the code 'X' will be removed from the parcel.

Time

a) Agricultural No Time Restriction - means there are no concerns respecting the administration of the parcel. Agricultural Crown Lands Branch will determine the lands ultimate disposition and tenure. Therefore, lands coded with 'No time restriction' may be leased for one year, 5 years, 20 years or lifetime, or could be permitted annually - for 5 years etc. The administrative decision is the responsibility of the Agricultural Crown Lands Branch.

b) Agricultural Yearly Use Only - means the Bloc Planning Committee has some concerns and is restricting the administration of the parcel by Agricultural Crown Lands Section such that the administrative tenure is limited to a one year basis. Thus, Agricultural Crown Lands Branch is limited to annual permits, renewable permits and one year leases. There will be no conversion of permits to leases greater than one year.

c) Specific Time Requirement - the Bloc Planning Committee determines that a specific time period is required, e.g., parcel available for hay only for 3 years or until 1990 etc.; the Bloc Planning Committee shall file a site plan stating all requirements deemed appropriate.

Unique/Rare Sites - Crown land and/or water areas associated with (1) rare and endangered fauna and flora currently identified by the Government of Canada and relevant to Manitoba and by the Government of Manitoba as having a rare or endangered status. Species identification will be in accordance with Federal and Provincial legislation, (2) historic and archaeology sites, (3) unique scenic sites, (4) significant natural cultural features and (5) other significant resource sites - e.g., seed cone area. As a result of the nature of these sites no other use or development is allowed.

DEFINITIONS

Urban Use - Crown lands which are presently being used as town halls, community centers, athletic grounds, community clubs, churches, missions, graveyards, oil tank storage areas, refineries, residences, business establishments, etc., or lands which will be used for urban purposes in the future.

Utility Sites - Crown lands which are presently being used or identified for future uses such as roads, hydro transmission lines, pipelines (oil, gas, water), telephone, railways.

Water Retention Sites - Crown lands which have been identified as being important for water retention. The sites may be permanent or intermittent bodies of water. To be coded as water retention the water/area must be of importance, that is, of some identifiable use: i.e., ground water recharge area, water holding area, siltation area, etc.

Wildlife - Crown lands coded under this category shall be limited in general to those areas identified as best kept from development and long term commitment to secondary uses because of their importance to wildlife as habitat. Generally, these areas are to remain as they occur in nature, however, habitat improvement is not excluded. Wildlife includes, birds, reptiles, etc. e.g., prime deer wintering areas.

Wildlife Management Area - a Crown land area designated as such in the regulations under An Act Respecting the Administration and Conservation of Wildlife in the Province.

Wild Rice - Crown land and water areas which are presently used or will be used in the future for purposes of wild rice management and harvesting. It does not include paddy production.

MANITOBA **Crown Land Classification Committee**

Interdepartmental Operational Crown Land Plans

EXPLANATIONS & INTERPRETATIONS

1. Interpretation of Non-Conforming Uses

Non-Conforming Use - is an existing use which because of its existence must be accepted in the short term (a lifetime lease) but which is inappropriate in the long term. The intent is to change the use at the earliest possible time with a minimum of negative social impact. Thus, the use will be changed upon expiration of existing commitments.

i) Where the parcel is under lease, the non-conforming use can continue until the lease expires. Upon expiration of the term of the lease or cancellation of the lease, the non-conforming use will no longer be allowed. In-family transfers are permitted.

ii) Where the parcel is under permit, the non-conforming use can continue until the person holding the permit no longer wishes to renew the permit. Upon the lapsing of the permit by the permittee, the non-conforming use will no longer be allowed.

However, the Bloc Planning Committee may still request to have an existing lease or permit cancelled before expiration, irrespective of the general interpretation above. In such cases, the Bloc Planning Committee must request in writing to the Crown Land Classification Committee indicating the reason for the cancellation. If the Crown Land Classification Committee agrees, the normal notice of cancellation and procedure would apply, assuming Ministerial agreement.

Example Situation

Land Use Code is J1, Natural Lands - Erosion Prone/Fragile and
Hazard Lands. No Agricultural Use.

Present land use is, Hay and Grazing, leased to year 2010.

Application

The Crown Land Operational Classification Map shall show the parcel as J1. The land shall continue to be used for Hay and Grazing until 2010 when use on the parcel shall be terminated.

It shall be the responsibility of the Bloc Planning Committee to identify these parcels which have a non-conforming use.

EXPLANATIONS & INTERPRETATIONS

2. Interpretation of Development

Example Situation

Land Use Code 4a: Hay and grazing, agricultural - no time restriction, providing 40 acres of native, woody vegetation remain, the amount of development allowed is 80 acres.

IF Quarter is described as follows	THEN: Acres of bush which still can be improved	AND Acres of bush retained
1. 160 acres all native bush	80	80
2. 140 acres bush; 20 acres native meadows	80	60
3. 120 acres bush; 40 acres already cleared	40	80
4. 100 acres bush; 60 acres native meadow	60	40
5. 120 acres bush; 40 acres lake	80	40
6. 100 acres bush; 40 acres lake	60	40
7. 100 acres bush; 40 acres native meadow; 20 acres lake	60	40

EXPLANATIONS & INTERPRETATIONS

3. Multiple Coding

Multiple coding is the technique used to assign more than one code to a parcel of Crown land. The codes which may be assigned need not be complementary or compatible.

The primary and secondary land uses are determined by the order in the code listing. Therefore the first code listed is considered the primary use followed by the secondary, tertiary, etc. land uses.

For purposes of multiple coding, simplification of the symbolization is required. For example.

Old Code	New Multiple Code
1. C1/A1	C/A

The numeral 1 has been dropped, however the meaning has not changed, i.e., wildlife priority/forestry secondary use: no agricultural use.

Old Code	New Multiple Code
2. C1/7a	C/7a

The numeral 1 has been dropped. The code interpretation being primary use wildlife (C) secondary use hay and grazing no development (7a). The use of the number 1 in this case was confusing and inappropriate.

Old Code	New Multiple Code
3. C2/B2	C/B2
C4/A4	C/A4

The first numeral is eliminated. The meaning being wildlife priority (C), outdoor recreation secondary use, hay only no development, yearly use only tertiary use. Similarily for C/A4.

4. Other Examples are:

Ea/8a. E/8a
A1/C6. . . . . A/C6
N1/4a. N/4a
A1/7a. A/7a
C1/B1/7a . . . C/B/7a
7a/J4. . . . . 7a/J

Note wherever appropriate, the land use should be stated first i.e., codes A, B, C, D, E, while land characteristics are indicated after the land use i.e., codes J, K, M, for example.

J1/C1 C/J

EXPLANATIONS & INTERPRETATIONS

4. Recreational Land Use Coding

In an effort to recognize the importance of high capability recreational Crown lands, the Crown Land Classification Committee has agreed to a general approach in identifying and coding these lands.

a) All Canada Land Inventory Class 1 (recreation) Crown land regardless of present commitment shall be coded B1. Where there is a non-conforming use code B1.

b) All Canada Land Inventory Class 2 and 3, (recreation) Crown lands should be coded for recreation. The Bloc Planning Committee shall determine which of the outdoor recreation codes are appropriate for each parcel. Again, where there is a non-conforming use the code shall be underlined. The Bloc Planning Committee shall also identify the other use (code) which can be made of these lands without destroying or damaging the land's capability for recreation. Thus if a parcel is capable of sustaining hay and grazing but no development is recommended to protect the recreational value, these lands shall be coded as follows: B/7a or B/7d or B4.

Where no other use can be made of the parcel indicate as follows: B1.

5. Significant Shorelands

This code may only be applied by the Crown Land Classification Committee.

Significant shorelands shall be identified by the code "O" followed by the reason for its significance, e.g., fisheries, outdoor recreation, etc.

a) Where the shoreland occurs on a quarter section where there is no agricultural, forest harvesting, recreational development etc. occurring, or being considered the area shall be coded for example:

OB - for significant shorelands from the outdoor recreation perspective
OC - for significant shorelands from the wildlife perspective
OT - for significant shorelands from the fisheries perspective

b) Where the shoreland is presently under agricultural use the quarter shall be coded: O/SP. A site plan will then be prepared detailing the exact area of shoreland to be protected, for what purpose and the allowable use on the remainder of the quarter.

From Highway #20 West
Develop fields in such a manner that:
- approx. 300 ft. of bush will be left adjacent to streams
- continuous blocks of bush larger than 40 ac. will be left (may be on more than one quarter)
- light soil will not drift
- snow will not block roads
